**Amendment**

Honorable Commissioner of Patents and Trademarks  
Washington, DC 20231

Sir:

In response to the Official Action mailed from the United States Patent and Trademark Office on November 7, 2002 in connection with the above-identified application, please consider the following remarks; the Declaration under 37 C.F.R. ¶ 132 submitted herewith; and substitute the enclosed sheet of claims (page 35) for the set of claims in the replacement pages that were filed in this case on October 11, 2002.

**Remarks**

Claim 1 has been amended to correct a typographical error.

Applicant respectfully requests that the rejection of claims 1 through 8, inclusive, under 35 U.S.C. ¶ 101 on the ground that these claims are directed to an invention that contradicts known scientific principles be withdrawn.

This rejection is based on an assumption that a structure characterizing the claims in issue violates the principle of conservation of energy because, as alleged in the instant Official Action, the claimed structure would "create" energy.

Applicant submits that this position reflects an incorrect interpretation of the claimed invention. Applicant's recited structure does not "create" energy, but instead recognizes that, as stated in page 2, lines 7 to 15 of the application as filed:

... the kinetic energy of a system of masses in motion relative to each other is different from the kinetic energy of that same system when measured relative to some point outside of the 'moving' system (i.e. a 'stationary' system) that is receding or advancing relative to the 'moving' system. The differences between these kinetic energies, as measured within the 'moving' system of moving masses and as measured from a point (or a system)
